FOR IMMEDIATE RELEASE

CIPRIANI COLLEGE OF LABOUR AND CO-OPERATIVE STUDIES CHOOSES CAMS ENTERPRISE™

With its all-encompassing and seamless administrative features, full-featured Portals, and built-in online learning, CAMS® is selected for its efficient and secure ability to connect students, faculty, and staff working in different locations.

September, 2008 – St. Louis, MO. How does a growing multi-campus institution like Cipriani College of Labour and Co-operative Studies in Trinidad and Tobago quickly create an environment where its Students can learn, access information, and interact with Faculty and Staff working in different locations? They acquired a completely web-based and totally integrated administrative solution capable of everything that they need right out of the box. That is exactly what Cipriani College of Labour and Co-operative Studies did, choosing Three Rivers Systems' CAMS Enterprise, the all encompassing Academic ERP (Enterprise Resource Planning) solution built to enhance the way higher education works.

When Cipriani College of Labour and Co-operative Studies began their search for a replacement to their aging Student Information System (SIS), they thought they were going to have to acquire and interface multiple administrative systems to manage Student, Staff, Faculty, and Alumni information and interactions. After all, with the exception of CAMS Enterprise, most of today's higher education administrative systems offer core functions as separate, stand alone systems interfaced by middleware. The trained professionals at Cipriani College of Labour and Co-operative Studies knew through experience that systems tied together by middleware often result in complex implementations, additional staff time, more equipment, complex reporting, decreased or non-existent automation, and escalating maintenance fees.

After a thorough search of the market, Cipriani College of Labour and Co-operative Studies was pleased to learn that there is a better way. CAMS Enterprise was designed as an integrated solution to eliminate inefficiencies, and was created specifically to provide institutions with essential functions like Admissions, Financial Aid, Registration, Course Management, Degree Audit, Portals, and Development, in a single solution.

Further contributing to Cipriani College of Labour and Co-operative Studies decision to choose CAMS, was Three Rivers Systems' implementation track record. With over two decades of experience serving higher education and hundreds of successful implementations around the globe, Three Rivers Systems provided Cipriani College of Labour and Co-operative Studies' leadership with not only a totally

integrated solution, but piece of mind. Three Rivers Systems' proven implementation methodology results in an average CAMS Enterprise system implementation in 6-12 months, as opposed to the typical multi-year implementation of other vendors.

Another benefit of totally integrated solutions like CAMS Enterprise is the consistent and friendly User Interface (UI). Since CAMS Enterprise's functions were designed as a coherent collection, when Cipriani College of Labour and Co-operative Studies' end-users learn one function, they can have all the other functions of the system appear and operate the same.

Cipriani College of Labour and Co-operative Studies also looks forward to its Students, Staff, and Faculty being able to access information and interact, regardless of their location. This is possible because CAMS Enterprise's Portals are also an integrated part of the solution, offering end users with an Internet connection and a browser the ability to learn, work, and collaborate from anywhere, at anytime. Cipriani's students will be able to access their information, participate in distance learning, register, and even pay bills online. And since CAMS Enterprise's Portals store information in one centralized location, data is available across all other functions of the solution immediately, providing all users with access to the same information in real-time.

Another exciting benefit of the CAMS Enterprise architecture is its scalability. When the time comes for Cipriani College of Labour and Co-operative Studies to grow, whether it's to accommodate more Students or additional campuses, it will simply need to add processors and servers to support its growth. And, since Three Rivers Systems' customers pay a one-time license fee, Cipriani College of Labour and Co-operative Studies can take on new enrollments with the confidence of knowing they will not be surprised by additional, hidden fees. This one-time license fee is unique in the industry and is representative of Three Rivers Systems' dedication to its customers.

About Cipriani College of Labour and Co-operative Studies (<http://www.ccls.edu.tt>)

Cipriani College of Labour and Co-operative Studies is a tertiary/community College located in Trinidad offering both full and part-time students Certificates and Diplomas. The College's activities do not only embrace the usual teacher/student relationship, it trains workers from different organizations in areas where its expertise has clearly been established. *Source: Cipriani College of Labour and Co-operative Studies*

About CAMS Enterprise™

CAMS Enterprise™ is the totally integrated and 100% web-based Academic ERP solution for Higher Education institutions. The solution helps institutions of all sizes and types communicate with their Students through Portals, and manage the entire student lifecycle – Admissions, Registration, Student Records, Course Management, Financial Aid, Fiscal Management, HR/Payroll, Development, and Alumni Relations. Built with pure Microsoft technologies, CAMS Enterprise™ ensures compatibility, efficient use of resources, scalability, and complete automation.
